

## Year 6 Challenge – Science

Astronauts Robert Behnken and Douglas Hurley headed to the International Space Station on May 30<sup>th</sup> 2020.

Many people went outside to watch the ISS pass, but in order to see this clearly in the sky, we need to get above houses, apartments and many tall buildings when living in urban areas.

Challenge: You are to build a tower using household / outdoor materials e.g. newspapers, cello tape, sticks, paper etc, as tall as you can but it must be able to hold five, 1p coins on top of it and it must be able to stand without you having to hold the structure. Once complete, measure the height and tweet a picture of the structure to @MaestegScience with the #MCSTowerChallenge2020
